## 1. Introduction

### Why do I need to provide references in my work?

- To show anyone who reads your work that you understand the topic and can demonstrate your own thoughts on this.
- To demonstrate that you have read widely.
- To enable the reader to locate where you obtained each quote or idea.
- By providing the original source you are acknowledging that you have read the work and recognise the original author(s) ideas.
- Referencing styles do differ and at the Institute of Health and Social Care Studies we endorse the Harvard style of referencing.

### Academic Honesty

If you understand the reasons for referencing it is evident why you should not pass off work of others as your own. Do not be tempted to pretend that someone else's words are your own. Not only may the person reading, or more importantly marking your work, be familiar with the original, but also more credit is given to a student who has thoroughly researched the topic area and has cited the sources of their work. In addition, failure to give credit to other people's work appropriately could be considered plagiarism. For more information see the Appendix in your Student Handbook entitled "*Use of unfair means in the assessment process*".

### How do I provide references in my work?

The rest of this guide will provide detailed information on how to provide references in a variety of different circumstances. The most important thing to remember is to be consistent in the way you record your references.

During the course of writing an essay, report or other assignment it is usual to support arguments by referring to, or **citing**, information produced by other authors. This information could be presented in journal or newspaper articles, government reports, books or specific chapters of books, research dissertations or theses, material over the internet etc. When you **cite** someone's work in the text of your essay (an **in-text citation**), you also need to create a full **reference** for it at the end of your work. This gives the full details for the information source so that it can be traced by anyone who reads your work.

### The Harvard System

The Harvard style of referencing is an author-date system. In this system, the author's surname and year of publication are **cited** in the text of your work. The full details of the book are included in a **reference list** at the end of the assignment.

In-text citation

### Referencing List

The reference list should include details for everything that you cite in your assignment. It should be in alphabetical order by author with all the different types of material in one sequence. A reference list is always required when you cite other people's work within your assignment.

## **Bibliography**

This is a list of relevant items that you have used to help you prepare for the assignment but which are not necessarily cited in your text, e.g. general background reading to familiarise yourself with the topic.

“An effective structure is important” (Redman, 2006, p.22)

## **2. Citing References in-text using the Harvard System**

Any in-text reference should include the authorship and the year of the work. Depending on the nature of the sentence/paragraph that is being written, references to sources may be cited in the text in the following manner:

### **2.1 Author's name cited in the text**

When making reference to an author's work in your text, their name is followed by the year of publication of their work:

In general, when writing for a professional publication, it is good practice to make reference to other relevant published work. This view has been supported in the work of Cormack (2008).

Where you are mentioning a particular part of the work, and making direct reference to this, a page reference should be included:

Cormack (2008, pp.32-33) states that 'when writing for a professional readership, writers invariably make reference to already published works'.

An indirect reference

During the mid-twenties research undertaken in professional publishing (Cormack, 1994) showed that...

### **2.2 Author's name not cited directly in the text**

If you make reference to a work or piece of research without mentioning the author in the text then both the author's name and publication year are placed at the relevant point in the sentence or at the end of the sentence in brackets:

Making reference to published work appears to be characteristic of writing for a professional audience (Cormack, 2008).

### 2.3 More than one author cited in the text

Where reference is made to more than one author in a sentence, and they are referred to directly, they are both cited:

Smith (2009) and Jones (2011) have both shown ...

### 2.4 More than one author not cited directly in the text

List these at the relevant point in the sentence or at the end of the sentence, putting the author's name, followed by the date of publication and separated by a semi-colon and within brackets.

Where several publications from a number of authors are referred to, then the references should be cited in chronological order (i.e. earliest first):

Further research in recent years (Smith, 2009; Jones, 2011) has led to major developments ...

Recent research (Collins, 2006; Brown, 2008; Davies, 2010) shows that ....

### 2.5 Two authors for the same work

When there are two authors for a work, they should be noted in the text directly using an **and**

White and Brown (2007) in their recent research paper found ...

Or indirectly

Recent research (White and Brown, 2007) suggests that.....

When there are two authors for a work they should be listed in the order in which their names appear in the original publication.

### 2.6 More than two authors for a work

Where there are several authors (more than two), only the first author should be used, followed by **et al.** meaning **and others**:

Green, et al. (2010) found that the majority ...

or indirectly:

Recent research (Green, et al., 2010) has found that the majority of ...

## 2.7 Several works by one author in different years

If more than one publication from an author illustrates the same point and the works are published in different years, then the references should be cited in chronological order (i.e. earliest first):

as suggested by Patel (1992; 1994) who found that ...

or indirectly:

research in the nineties (Patel, 1992; 1994) found that ...

## 2.8 Several works by one author in the same year

If you are quoting several works published by the same author in the same year, they should be differentiated by adding a lower case letter directly, with no space, after the year for each item:

Earlier research by Dunn (2005a) found that...but later research suggested again by Dunn (2005b) that ...

If several works published in the same year are referred to on a single occasion, or an author has made the same point in several publications, they can all be referred to by using lower case letters (as above):

Bloggs (2009a;2009b) has stated on more than one occasion that ...

## 2.9 Chapter authors in edited works

References to the work of an author that appears as a chapter, or part of a larger work, that is edited by someone else, should be cited within your text using the name of the contributory author not the editor of the whole work.

In his work on health information, Smith (1975) states ...

**In the reference at the end of your document, you should include details of both the chapter author and the editor of the whole work**

Smith, J. (1975). 'A source of information'. In: Jones, W. (Ed.). (2000). *One hundred and one ways to find information about health*. Oxford: Oxford University Press. Ch.2.

## 2.10 Corporate authors

If the work is by a recognised organisation and has no personal author then it is usually cited under the body that commissioned the work. This applies to publications by associations, companies, government departments etc. such as Department of the Environment or Royal College of Nursing.

It is acceptable to use standard abbreviations for these bodies, e.g. RCN, in your text, providing that the full name is given at the first citing with the abbreviation in brackets:

1st citation: ... research in 2006 undertaken by the Royal College of Nursing (RCN) has shown that ...

2nd citation: More recently the RCN (2007) has issued guidelines ...

Note that the full name is the preferred format in the reference list. Some reports are written by specially convened groups or committees and can be cited by the name of the committee:

Royal College of Nursing, 2006. *Children in the Community*. London: RCN.

Royal College of Nursing, 2007. *Administering intravenous therapy to children in the community setting: Guidance for nursing staff*. London: RCN.

Some reports are written by specially convened groups or committees and can be cited by the name of the committee:

Committee on Nursing (1972)

Select Committee on Stem Cell Research (2002)

Note there are some exceptions to this such as:

BBC Philharmonic Orchestra

BBC News

Where the abbreviations or initials form part of the official name.

## 2.11 No author

If the author cannot be identified use **Anonymous** or **Anon.** and the title of the work and date of publication. The title should be written in italics. Every effort should be made to establish the authorship if you intend to use this work as supporting evidence in an academic submission:

*Marketing strategy* (Anon., 2006)

## 2.12 No date

The abbreviation **n.d.** is used to denote this:

Smith (n.d.) has written and demonstrated ...

or indirectly:

Earlier research (Smith, n.d.) demonstrated that ...

Every effort should be made to establish the year of publication if you intend to use this work as supporting evidence in an academic submission. For further advice see Section 7 *References with missing details*

## 2.13 Finding the year for Editions or Revisions

Finding the year if there are Editions or Revisions of a book

Use the year of the latest edition of a book, this is generally stated on the back of the title page. After the author, state the year in the in-text citation. Include the number of the edition in your full reference, after the title. Do not include this if it is the 1st edition. Books which don't show an edition number are the first edition. Treat Revisions as a new edition. Use the year of the revision as the date. In your full reference add rev. after the edition number eg. 3rd rev. ed.

## 2.14 Page numbers

Including the page numbers of a reference will help readers trace your sources. This is particularly important for quotations and for paraphrasing specific paragraphs in the texts:

Lawrence (2004, p.124) states "we should expect ..."

or indirectly:

This is to be expected (Lawrence, 2004, p.124) ...

Please note page numbers: preceded with p. for a single page and pp. for a range of pages.

## 2.15 Quoting portions of published text

If you want to include text from a published work in your essay then the sentence(s) must be included within quotation marks, and may be introduced by such phrases as:

the author states that "....."

Or

the author writes that “.....”

In order for a reader to trace the quoted section it is good practice to give the number of the page where the quotation was found. The quotation should also be emphasized (where it is 50 words or more) by indenting it and enclosed in quotation marks. This clearly identifies the quotation as the work of someone else:

On the topic of professional writing and referencing Cormack and Brown (1994, p.32) have stated that “when writing for a professional readership, writers invariably make reference to already published works...”

Or

“Outside the UK, the BBC World Service has provided services by direct broadcasting and re-transmission contracts by sound radio since the inauguration of the BBC Empire Service in December 1932, and more recently by television and online. Though sharing some of the facilities of the domestic services, particularly for news and current affairs output, the World Service has a separate Managing Director, and its operating costs have historically been funded mainly by direct grants from the UK government. These grants were determined independently of the domestic licence fee. A recent spending review has announced plans for the funding for the world service to be drawn from the domestic licence fee”. (Jones, 1967, p.27)

## 2.16 Secondary sources (second-hand references)

You may come across a summary of another author’s work in the source you are reading, which you would like to make reference to in your own document; this is called secondary referencing.

A direct reference:

Research recently carried out in the Greater Manchester area by Brown (1966 cited in Bassett, 1986, p.142) found that ...

In this example, Brown is the work which you wish to refer to, but have not read directly for yourself. Bassett is the secondary source, where you found the summary of Brown’s work.

Or indirectly:

(Brown, 1966 cited in Bassett, 1986, p.142)

It is important to realise that Bassett may have taken Brown’s ideas forward, and altered their original meaning. If you need to cite a secondary reference it is recommended that, where possible, you read the original source for yourself rather than rely on someone else’s interpretation of a work. For this reason it is best to avoid using secondary referencing.

**The reference list at the end of your document should only contain works that you have read. In the above example you would only list the work by Bassett.**

## 2.17 Tables and diagrams

When reproducing selected data, or copying an entire table or diagram, a reference must be made to the source.

In the following example, information is from a table found on p267 of the book *Management in the media: decision makers* by Robert Brown published in 2005. The original source of the data used in the table in Brown's book was the National Statistics Office, 1985.

**If you quote from this table in the text of your essay - treat as secondary referencing:**

... historical figures demonstrate that only sixty percent of households had televisions in Britain by the 1970s (National Statistics Office, 1985 cited in Brown, 2005, p. 267).

**If you reproduce the table in your essay:** replicate the whole table, and add a citation below the table to acknowledge where the table was found

| Television ownership in England and Wales<br>(Percentage of households) |      |      |
|---|------|------|
| Year  | 1970 | 1980 |
| Percentage  | 60   | 70   |
| Source: National Statistics Office, 1985                                |      |      |

1985 National Statistics Office, 1985 cited in Brown, 2005, p.267.

**Finally include the full details of the source, in this case the book in your reference list:**

Brown, R., 2005. *Management in the media: decision makers*. 4th ed. Harlow: FT Prentice Hall.

## 2.18 Websites

To cite material found on a website, you need to identify who is responsible for producing it – the authorship.

This may be a named individual or a corporate author (an organisation, institution or company).

If you cannot see a named author, look for a corporate author. This could be in the website name, the About Us section or in the URL or web address.

The date for a website may not be obvious. Look around the page if it is not in the headline information – it might be at the bottom in the copyright statement.

In this example the authorship would be Mundasad and the date 2016.

Recent research on meningitis (Mundasad, 2016) has shown ...

This is the date headline 20 In this example the authorship would be FEE and the date 2016.

An in-text reference for the above examples would read:

The Foundation for Economic Education (FEE) recently gave the "Blinking Lights" Award to a Sussex resident (FEE, 2014) which recognises the contribution of....

### 3. Compiling the Reference List

#### 3.1 General guidelines, layout and punctuation

The purpose of a reference list is to enable sources to be easily traced by another reader. Different types of publication require different amounts of information but there are certain common elements such as authorship, year of publication and title.

Section 7 deals with references where some of the details are unknown.

The Harvard style lays down standards for the order and content of information in the reference. Some variations of presentation are acceptable provided that they are used consistently.

All items should be listed alphabetically by author or authorship, regardless of the format, ie. whether books, websites or journal articles etc. Where there are several works from one author or source they should be listed together but in date order, with the earliest work listed first.

#### 3.2 Books

##### 3.2.1 Books with one author

Use the title page, not the book cover, for the reference details. Only include the edition where it is not the first. A book with no edition statement is most commonly a first edition.

The required elements for a book reference are:

Author, Initials. (Year). *Title of book*. (Edition). (only include this if not the first edition) Place of publication (this must be a town or city, not a country):  
Publisher.

Reference where 1st edition

*Baron, D. P. (2008). Business and the organisation. Chester: Pearson.*

where 3rd edition

*Redman, P. (2006). Good essay writing: a social sciences guide. (3rd ed.). London: Open University in assoc. with Sage.*

An in-text reference for the above examples would read:

*Organisations have been found to differ (Baron, 2008) when there is ...  
Leading social scientists such as Redman (2006) have noted ...*

*\*Place of publication can generally be found on the back of the title page in the address of the publishing company. Where there are several locations, choose the UK one in preference to other. Please note where there is likely to be confusion with UK place names; for USA towns include the State in abbreviated form e.g. Birmingham, Alabama would be ...  
Birmingham, AL.*

### 3.2.2 Books with two authors

For books with two authors the names should be included in the order they appear on the title page. Use an **and** to link the authors.

The required elements for a reference are:

Authors, Initials. (Year). *Title of book*. (Edition). (only include this if not the first edition) Place: Publisher.

Weiss, T.D. and Coatie, J.J. (2010). *The World Health Organisation, its history and impact*. London: Perseus.

An in-text reference for the above example would read:

Leading organisations concerned with health ( Weiss and Coatie, 2010) have proved that.....

### 3.2.3 Books with more than two authors

The required elements for this type of reference are:

First author, Initials.followed by **all authors**. (Year). Title of book. (Edition). (only include this if not the first edition) Place: Publisher.

Reference

Grace, B. Weiss, T.D. and Coatie, J.J. (1988). *A history of the world*. Princeton, NJ: Princeton University Press.

### 3.2.4 Books which are edited

For books which are edited give the editor(s) surname(s) and initials, followed by **ed.** or **eds.**

The required elements for a reference are:

Author, Initials. (ed.) (Year). *Title of book*. (Edition). Place: Publisher.

Keene, E. (ed.) (1988). *Natural language*. Cambridge: University of Cambridge Press.

### 3.2.6 Multiple works by the same author

Where there are several works by one author and published in the same year they should be differentiated by adding a lower case letter after the date.

**Remember that this must also be consistent with the citations in the text.**

For multiple works the required elements for a reference are:

Author, Initials. (Year followed by letter). *Title of book*. Place: Publisher.

Soros, G. (1966a). *The road to serfdom*. Chicago: University of Chicago Press.

Soros, G. (1966b). *Beyond the road to serfdom*. Chicago: University of Chicago Press.

Works by the same author should be displayed in the order referenced in your assignment, earliest first (as above).

An in-text reference for the above example would read:

(Soros, 1966a)

(Soros, 1966b)

This also applies if there are several authors with the same surname. As an alternative their initials can be included in the citation.

So for example, if you have sources written by George Soros and also by

Manuel Soros, you would list them in alphabetical order:

(Soros, G. 1966a)

(Soros, G. 1966b)

(Soros, M. 1966)

Where there are several works by one author, published in different years, these should be arranged in chronological order, with the earliest date first.

### 3.2.7 Books which have been translated

For works which have been translated the reference should include details of the translator, the suggested elements for such references being:

Kant, I. (1785). *Fundamental principles of the metaphysic of morals*. Translated by T.K. Abbott. (1988). New York: Prometheus Books.

For works in another language, reference these in the same manner as an English language work but provide a translation. Students should check with their Faculty the validity of including original language works.

For works which are reprints of classic original works, the reference should include details of the original date of the work and reprinting details, the suggested elements for such references being:

Author, Initials., Original Year. Title of book. (Imprint/reprint and then year). Place of publication: Publisher.

#### 4.17 Quotations from written plays

When reviewing a number of different plays it is essential to cite the title of the plays. If reviewing one play (for example *Twelfth Night*) it is not necessary to repeat the title in your citations.

Published plays may contain line numbers, particularly in classic texts such as Shakespeare. If they exist it is good practice to include the line number, but Act and Scene numbers must always be included.

Classic plays are available in edited editions and the editor's name should be included with your reference.

The required elements for a reference are:

Author, Initials. (Year) (of the edition). *Title of play*. Editors, Edition. (only include this if not the first edition) Place of publication: (this must be a town or city, not a country) Publisher.

Shakespeare, W. (1995). *Twelfth Night*, (World's Classics series) Warren, R. and Wells, T. eds. Oxford: Oxford University Press.

An in-text reference for the above examples would read:

Much speculation has occurred when Malvolio imagines he might marry Olivia, "there is example for't; the Lady of the Strachy married the yeoman of the wardrobe" (Shakespeare, 1995, 2.5: 36-7).

#### 4.19 Interviews

Where you have conducted an interview - using a primary source, you are recommended to check with your academic support for detailed guidance on what you may include.

Where you are conducting the interview, it is important to check with the person being interviewed that they will be in agreement with a transcript of the interview being made available. Since this will not be a publicly available document, it may be included as a transcript within an Appendix in your piece of work.

The citation for this interview should refer to the Appendix.

In an interview (Appendix A) the findings of the report were reviewed and White agreed with ...

## 6. Unpublished Works

### 6.1 Unpublished works

You may occasionally have access to a document before it is published and may therefore not be able to provide full details:

Pattison, J., (in press) *A new book that I have written*. London: Vanity Press.

Woolley, E. and Muncey, T. (in press) Demons or diamonds: a study to ascertain the range of attitudes present in health professionals to children with conduct disorder. *Journal of Adolescent Psychiatric Nursing*. (Accepted for publication December 2002).

### 6.2 Informal or in-house publications

For informal publications, such as class handouts and leaflets, provide what details you can:

Institute of Health and Social Care Studies, 2012. Academic report writing. [leaflet] January 2012 ed. Guernsey: Institute of Health and Social Care Studies.

### 6.3 Personal communication

Where you refer to a more informal personal communication, e.g. letter, email, phone call or conversation, provide as much detail as possible and note the nature of the communication.

Permission should be sought before these sources are quoted, and a copy retained for reference.

Hindle, E. (2000). *Introducing Cow & Gate Omneo Comfort: an infant milk for digestive comfort*. [letter] (Personal communication, 2 June 2000).

O'Sullivan, S. (2003). *Discussion on citation and referencing*. [letter] (Personal communication, 5 June 2003).

## 7. References with missing details

Where there is no obvious publication date, check the content and references to work out the earliest likely date, for example:

|          |                             |
|----------|-----------------------------|
| 1995?    | probable year               |
| ca. 1995 | approximately 1995          |
| 199-     | decade certain but not year |
| 199?     | probable decade             |

Occasionally it may not be possible to identify an author, place or publisher. This applies particularly to what is known as 'grey literature', such as some government documents, leaflets and other less official material.

|      |  |
|------|--|
| Anon | author anonymous or not identifiable               |
| s.l. | no place of publication (Latin: <i>sine loco</i> ) |
| s.n. | no named publisher (Latin: <i>sine nomine</i> )    |
| n.d. | no date  |

Information such as place and publisher not found on the document, but traced from other sources, should be placed in square brackets.

**You should, however, be very cautious about using as supporting evidence material where you cannot identify the author, date or source.**
